

SURE FLOW D

BY AQUATECH PRO

World's Most Dependable Chemical Injection System!

Pump harsh chemicals against high pressure without the downtime typically associated with other brands!

Versatility

- Agricultural
- Municipal
- Industrial
- Residential

Highest Quality Materials

- NEMA Sealed Units (*Watertight*)
- Kynar Diaphragm / Viton O-Rings
- Hastelloy Springs & Spacers
- WQA Seal of Approval

Approved & Ideal for

- Liquid Chlorine
- Peroxides / Iodine
- Medications
- Any Acids

SFDS SERIES PUMP

is a single controller with PH probe & analyzer; also includes chemical level sensor with auto shut off when out of solution. Ideal for constant pressure or variable speed pumping systems.

SFDA SERIES PUMP

is a standard analog pump for a low cost option. For use on pressure switch or float activated systems.

Our SFDD dual pump system provides the best option to gas chlorination without the typical downside to liquid chlorine:

- PH probe and analyzer maintain a constant ph within programmed parameters.
- ORP sensor detects declining chlorine potency due to its instability and adjusts output accordingly to provide optimum sanitation.
- Level sensors detect and shuts system down when out of solution.
- Chlorine and Acid independent feeding or
- Acid and Chlorine feeding with priority on ph feeding
- On/Off or Proportional Feeding
